Our transformed go-to-market framework is driving gains in market share and improvement in our rankings in IPM. Our acquired portfolio has not only helped us increase our chronic segment presence and market rankings. but it is also beginning to positively impact our operating margins. We have made significant progress in the cardiology segment. Our domestic business showed strong resilience even during a period when the acute segment had relatively softer demand.

International business has performed well, with sustained traction in our CDMO segment. International formulations have shown strong growth outside South Africa, as we focus on being agile to market needs and scaling up with new launches in the medium and long term. We are excited about the growth ahead and remain focused on strong execution to deliver as per plan across both domestic and international markets."
